INTRODUCTION

Chandra Asri Group

PT Chandra Asri Pacific Tbk (Chandra Asri Group) is a Southeast Asia's leading energy, chemical, and infrastructure solutions company, operating integrated regional platforms based in Indonesia and Singapore.

Our Indonesian assets include the first and largest integrated petrochemical complex in Indonesia, the upcoming Chlor-Alkali and Ethylene Dichloride plant, and infrastructure solutions which cover electricity, water, logistics, and ports & storage; affirming our contribution as one of the pillars of the national industry. Meanwhile, our facilities on Pulau Bukom and Pulau Jurong serve as integrated petrochemical and refining production hubs in Singapore.

We are dedicated to sustainable collaboration and innovation, serving as Indonesia's Growth Partner.

INTRODUCTION

CALIBER 2026

CALIBER (Chandra Asri Limitless Innovation and Business Strategy Challenge) is the annual competition hosted by Chandra Asri Group, designed to provide a platform for emerging talents, particularly students, to showcase their analytical prowess, strategic thinking, and problem-solving abilities.

This year's theme, "Future-Ready Operational Excellence: Knowledge, Reliability, and Smart Manufacturing," challenges participants to develop a business proposal that leverages Artificial Intelligence (AI) to tackle critical manufacturing challenges across Chandra Asri Group's chemical facilities.

BACKGROUND

PT Chandra Asri Pacific Tbk (Chandra Asri Group) as an energy, chemical, and infrastructure solutions company in Southeast Asia has been continuously improved its operations to respond to the industry's dynamic.

Operating complex and asset-intensive petrochemical facilities in Indonesia, the Company relies on technical knowledge, equipment reliability, supply-chain readiness, and efficient resource utilization to maintain safe and continuous operations.

As its plants, systems, and operational data continue to grow, the Company is strengthening its digital transformation agenda by integrating data, analytics, and artificial intelligence into manufacturing processes. This transformation is intended to support faster decision-making, improve operational visibility, preserve critical plant knowledge, and enhance collaboration across functions within the Company.

Future-Ready Manufacturing Operations: Knowledge, Reliability, and Energy Intelligence is our grand theme, focusing on applying artificial intelligence to address critical manufacturing challenges in a petrochemical environment.

Participants are expected to design scalable, technology-driven solutions, including AI, that transform fragmented data or process into actionable insights. The proposed solutions may support technical knowledge retention, predictive maintenance, spare-part inventory optimization, energy and emissions monitoring, production forecasting, anomaly detection, and cross-functional decision-making.

The solutions should integrate relevant plant and enterprise data, provide transparent and traceable recommendations, and consider human oversight, data security, system reliability, and measurable business impact. Through this grand theme, the Company aims to accelerate the development of safer, more reliable, efficient, and intelligent manufacturing operations.

BUSINESS CASE COMPETITION

The competition consists of two stages: the Preliminary Stage and the Final Stage.

Preliminary Stage: Business Proposal Submission

Participants are required to select one of the two available use cases and develop a business proposal outlining their proposed solution.

Case 1: Manufacturing Knowledge Hub (AI-Powered Knowledge Integration)

This use case focuses on reducing improper execution risk caused by scattered knowledge sources, missing tacit knowledge, difficulty in finding trusted information, and disconnected operational data.

Case 2: Manufacturing Intelligence (Unified Dashboard, AI Insight, Root Cause Analysis, Follow-up Action Recommendation)

This use case focuses on addressing the challenges of fragmented manufacturing performance data across multiple dashboards, systems, and reports, making it difficult to monitor plant performance, identify root causes, prioritize alerts, and track follow-up actions

Detailed submission requirements and formatting guidelines are provided in the following section (see pg. 9-10).

Proposal must be submitted by **4 October 2026 at 23.59 WIB** at the latest. Link to upload the proposal will be sent by e-mail to all registrants.

Final Stage: Hackathon Event

The top 10 teams from the Preliminary Stage will be selected to advance to the 2-day Final Stage, which will be conducted in a hackathon format.

During the first day of the Final Stage, finalists will be presented with a new and entirely different use case and will have 24 hours to develop their solution. Each team will then present its proposed solution in a pitching session held on the following day.

Submission format for the Final Stage will be informed during the event. Pitching session will be conducted in English.

The event is scheduled on Wed-Thu, 4-5 November 2026 in Jakarta. The finalists will be notified later on the details. Please ensure your availability in advance.

SUBMISSION FORMAT

Preliminary Stage (Business Proposal Submission)

Please submit a clear representation of your proposed solution to demonstrate the concept, user flow, and expected output. To be eligible for preliminary stage review, you must submit these 3 materials:

1. A solution mock-up or prototype, which may be provided through Figma, accessible HTML, or other equivalent formats that allow Committee to understand and navigate the proposed result.
2. A 3-minute demo video that explains and demonstrates how the proposed solution works.
3. A presentation deck in PDF format consisting of a maximum of 7 slides, including the cover slide and excluding any appendix slides, following the required deck structure provided in the next section of this booklet (see pg. 10).

All materials should be delivered in English.

Proposal must strictly follow the guidelines provided. Non-compliance will directly affect the evaluation outcome.

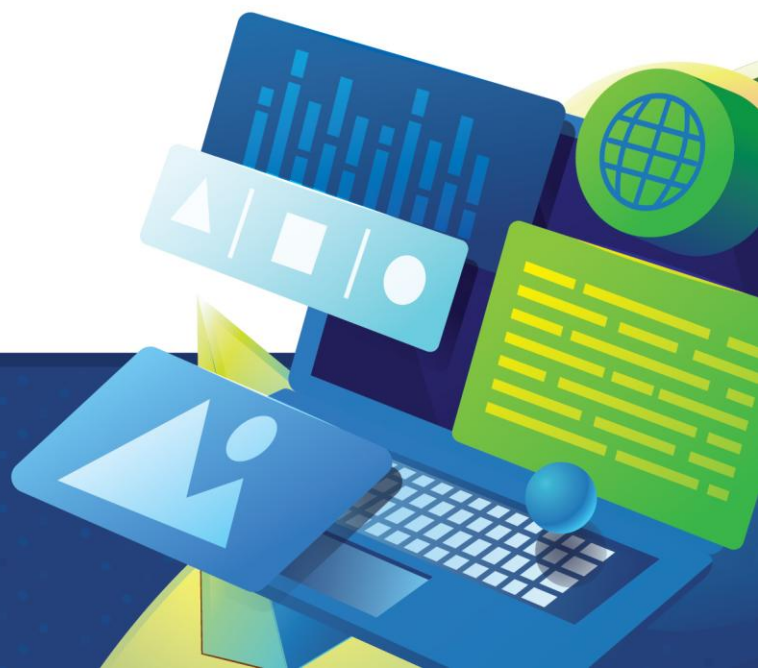

For Preliminary & Final Stage

Mandatory presentation deck structure:

Slide	Required Content																								
1	Cover Identify your team's name and the chosen use case.																								
2	Background & Problem Statement Explain the current challenges, supporting facts, and why the problem is important to solve.																								
3	Solution Present the proposed solution, including the high-level objective, workflow, and key technologies.																								
4	Business Impact Demonstrate the expected evaluation, measurable benefits, key performance indicators (KPIs), and success metrics.																								
5	Feasibility & Roadmap Explain the implementation feasibility, including technical, operational, legal, cybersecurity, data governance, and organizational readiness considerations. Provide an implementation roadmap and timeline.																								
6	Conclusion Summarize the proposed solution, key value, and expected outcomes.																								
7	Team Profile Provide team name, university, supervisor’s name, and details of team members including study program, semester enrolled, area of expertise, and contributions to the proposal. Please use the table below to present the information. <table><tr><th>No.</th><th>Name</th><th>Major</th><th>Semester</th><th>Area of expertise</th><th>Contribution</th></tr><tr><td>1</td><td>[Example-1]</td><td>Computer Science</td><td>6</td><td></td><td>Formulate the idea, etc.</td></tr><tr><td>2</td><td>[Example-2]</td><td>Chemical Engineering</td><td>7</td><td></td><td>Elaborate background and problem statement, etc.</td></tr><tr><td>3</td><td>...</td><td>...</td><td>...</td><td>...</td><td>...</td></tr></table>	No.	Name	Major	Semester	Area of expertise	Contribution	1	[Example-1]	Computer Science	6		Formulate the idea, etc.	2	[Example-2]	Chemical Engineering	7		Elaborate background and problem statement, etc.	3	...	...	...	...	...
No.	Name	Major	Semester	Area of expertise	Contribution																				
1	[Example-1]	Computer Science	6		Formulate the idea, etc.																				
2	[Example-2]	Chemical Engineering	7		Elaborate background and problem statement, etc.																				
3	...	...	...	...	...																				
	Appendix Appendix slides are unlimited. Include only highly relevant supporting materials that strengthen the proposal and provide additional evidence for evaluation.																								

EVALUATION CRITERIA

- 1. Problem Understanding & Business Impact**
 - Clarity of problem understanding, identification of impacted users, and articulation of pain points.
 - Expected benefits, KPIs, success metrics, and measurable business value with supporting data or evidence.
- 2. Solution Design & Prototype Quality**
 - Logical workflow, user journey, expected output, UX clarity, and prototype completeness.
 - If any: Relevance, strength, and novelty of technology use in the proposed solution.
- 3. Presentation Quality (Technical)**
 - Presentation structure, visual clarity, and storytelling flow.
 - Quality of demo video: pacing, narration, and ability to convey the solution effectively within the 3-minute limit.
- 4. Feasibility & Roadmap**
 - Realistic implementation plan covering technical, operational/legal/cybersecurity/etc. and organizational readiness.
- 5. Chemical Domain Relevance**
 - Fit with real chemical industry needs and selected case context.

HOW TO REGISTER

1. Visit the website <https://chandra-asri.com/id/caliber>.
2. Navigate to the CALIBER 2026 menu.
3. Fill out the registration form.
4. Upon completing registration form, registrants will receive a confirmation e-mail and the Case Book as reference for the business proposal.
5. If you do not receive the confirmation e-mail and the case within 48 hours, please contact the 2026 CALIBER Committee at caliber.2026@capcx.com.

TERMS & CONDITIONS

1. Active undergraduate (S1) or vocational program (diploma) students are eligible to participate throughout the competition period from August to October 2026.
2. Participants must form teams consisting of 2 to 3 members from the same university or college.
3. Each participant (member) are not allowed to be registered in more than 1 team.
4. Students who are involved in academic violations or under university sanctions during the competition period are not allowed to participate.
5. There can be no changes to team members and team's name once the competition begins.
6. Each team must have a faculty advisor or lecturer as a supervisor.
7. Each team is permitted to submit only 1 proposal.
8. Upon selection, all team members of are required to attend the offline Final Stage in-person. Please ensure your availability on 4-5 November 2026.
9. By registering, participants agree to adhere to the rules and guidelines of CALIBER 2026.

RULES & REGULATIONS

1. Proposed ideas must be relevant to the provided case.
2. Every team must adhere to the regulations outlined in this booklet and submit all necessary documents.
3. All submitted materials should be in English.
4. All submissions become the property of Chandra Asri Group and will not be returned.
5. Plagiarism or any other misconduct will result in disqualification.
6. Decisions made by the juries and the Chandra Asri Group 2026 CALIBER Committee are final and cannot be appealed.
7. Participants will be notified of any changes to the rules and regulations.

FAQ (General)

1. **Can I register for more than one team?**
No. Each participant can only be registered in one team.
2. **Can team members come from different faculties/majors?**
Yes, you can form team with student(s) from other faculties/majors as long as you are all from the same university/college.
3. **Do we need to work on both use cases for Preliminary Stage?**
No, please choose only one case to solve.
4. **Can we combine ideas from both cases for Preliminary Stage?**
No. Select just one of the two cases; while extended solutions to the problem may be developed for whichever case you pick, your attention should remain on that particular case.
5. **What file formats and size limits apply to the prototype, video, and presentation deck?**
For the Preliminary Stage, all 3 (three) deliverables combined should be no bigger than 10 MB. Submission format for Final Stage will be informed during the event.
6. **What language should be used for the presentation deck and pitch?**
All materials should be written and delivered in English.
7. **Can we use generative AI tools as part of our solution development process?**
The use of AI tools is permitted, provided they are used lawfully and in accordance with their applicable terms and conditions and privacy notices. All AI-generated outputs must be validated, iterated, and evaluated to ensure the quality, accuracy, and reliability of the resulting technology solutions before use or implementation.
8. **Can we update or replace our submission after it has been submitted?**
No. Only the first submission submitted by your team will be accepted and evaluated.
9. **What happens if we fail to submit one of the required deliverables?**
Your team will be disqualified and cannot continue to the next stage.
